Quotes are available on the spot, starting at \$85 for a triple store front. Buy 4 services for \$295 today, saving \$55 if paid in full up front.

I am your local SERVPRO Marketing Manager and wanted to reach out to you today as one of the preferred, local Remediation and Restoration Companies to serve our community during this unprecedented time.

SERVPRO has developed protocols for both preventative and confirmed covid-19 disinfecting.

SERVPRO Fogging Disinfecting service is designed as a preventative measure at facilities that have no known cases of Coronavirus. The preventative disinfecting services would consist of an application of an EPA registered disinfectant to be applied using a ULV (Ultra Low Volume) fogger. This application is both cost effective for our Clients as well as an efficient way to disinfect large areas. With using this method of disinfecting services, all hard-nonporous surfaces should be cleaned and free of any heavy soiling prior to application.

Leave behind Counter Display "Disinfectant Fogging Applied by SERVPRO Professionals."
