

Chamber of Commerce Means "COMMERCE"

The Chamber of Commerce provides its members with tools and services that will help increase commerce in our area. To do this effectively online, the Chamber aggregates all of its membership into a single marketing location we often refer to as the Chamber Search Engine. In order for a member to be added to the Chamber Search Engine, we need to complete a few steps as described here; 1. Business joins the Chamber and 2. Business receives an invite into the system to answer some important questions for excellent results.

Membership includes a business marketing module developed by Mark LeBlanc. He is the most recent president of the National Speakers Association (NSA) and author of "Growing Your Business".

Once a member is setup the business will be optimized for search and a powerful online marketing presentation will be created.

Members without a website may order a FREE domain name which converts your presentation into a really nice primary website. Members with an existing website will realize more traffic.
