****Pneumonia Vaccines Available***

- The VNA’s priority is to keep your community healthy, and the non-profit organization encourages all area residents to get their flu shot early in the season.
- Money raised by the “Shoo the Flu” program remains in your community and helps fund VNA charitable health care initiatives.
- The VNA offers two types of flu vaccinations: a high-dose vaccine, and a quadrivalent vaccine.
- The high-dose vaccine is only for those individuals who are 65-years or older and contain four times the amount the antigens. The quadrivalent vaccine is for individuals 10 years or older and offers broader coverage than the regular flu shot.
- All VNA flu vaccines are manufactured in the United States.
