Since Home Theater is a personal hobby of ours, we have a greater understanding of the needs of cabinetry designed for this purpose. We enjoy the challenge of designing and building them. We can also supply and install all audio/video components for a complete Home Theater system for you. Or, we will gladly work with you or another A/V installer to meet any special requirements you might have.

Would you like the A/V components behind door(s)? Yes \_\_\_\_\_ No \_\_\_\_\_

If yes, Glass \_\_\_\_\_, Solid \_\_\_\_\_, or Other \_\_\_\_\_?

A/V components can be placed behind solid doors and still be controlled with remotes by using an emitter system which will be provided by us if we're supplying your A/V components.

We install air vents in any cabinet designed to house A/V components. We also allow space at the back of the shelves in these cabinets to run wires. Still, it is the responsibility of the A/V installer to cut or drill openings between cabinets to run wires and determine whether ventilation is adequate for each individual installation.

If speakers are to be housed in cabinets, would you like us to supply Acoustic Fabric Grills to hide them? Yes\_\_\_\_ No\_\_\_\_

If yes, color number and name\_\_\_\_\_

Ask for an Acoustic Fabric sample card to choose from.

Just as with appliances, it is helpful when bidding (and essential for building), to have as much information as possible about the components that will go in the cabinets. Also, for Entertainment cabinets, you may want to leave some extra room to expand.

If you have any questions regarding this questionnaire or your cabinets in general, don't hesitate to contact us by any means shown on the front page. Your contractor may be helpful in answering many of these questions with you. If you have any other special requirements, please list them below and/or on the back. Thank you for your time.
