

Leadership is an action

I learned I possess the ability to lead

The volunteer opportunities will stick with me, they made my day every time I served

I discovered my strengths and can see what value I offer

I was exposed to the positive side of our community that my position in law enforcement doesn't often allow me to experience

I can find strengths in others that I don't have

I knew of these people in this class before arriving, but I didn't KNOW them until we were here

My eyes were opened to businesses and organizations I didn't know existed

I joined a civic club because I was exposed to groups by LFC

Little did I know how much this class was going to mean to me before we started

If we don't utilize this knowledge or skill from this class, we're doing a disservice

I realize some negative "leaders" I worked for aren't leaders at all, they're just bosses. This class is made up of leaders
