

Future proof

The next generation of payments. Here. Now.

An intuitive and familiar menu layout for easy use. The unit includes a backlit screen and keypad for all lighting situations.

The U.S. is adopting EMV as the new standard in secure transactions. Be EMV ready with security and peace of mind.

Easy to get around.

Lock down the data.

It's all in the wave.

The need for speed.

NFC (Contactless) devices make life easier and more convenient by completing transactions with a single wave.

Faster checkout speeds get customers on their way quicker. IP transactions take less than a second to process.

Will you be ready?

If you have one of the following terminals today, you are NOT ready to accept EMV/NFC transactions:

Hypercom T4205

Hypercom T7Plus

Omni 3750

Omni 3730

Nurit 2085

"Visa is announcing plans to accelerate the migration to contact and contactless EMV chip technology in the United States. The adoption will help prepare the US payment infrastructure for the arrival of mobile payments and EMV."

– VISA, August/2011

"We are starting to see an evolution from typical static magnetic stripes cards to more intelligent devices such as EMV chip cards and NFC mobile phones."

– Forbes, March/2013
