

The PayHub Mobile Hub allows you to securely accept credit cards and track cash transactions through your iOS or Android device. Mobile Hub provides support for multiple credit card transaction types including Sale, Void, Refund, Auth Only and Offline transactions. You can also track cash sales, invoices numbers, notes and tips. All transactions processed through Mobile Hub are integrated seamlessly into the Virtual Hub account. Merchants can see all transactions ran on their Mobile Hub devices, manage their validated mobile devices and control access to Mobile Hub through the Virtual Hub permission system. Merchants will have access to a full scale solution from PayHub including Virtual Hub, E-Commerce Hub and now, Mobile Hub.
