

HMS HAS THE BEST RETURN-TO-WORK* SCORE.

HIGHER SCORE = *FASTER* RETURN TO WORK

2018 MCO REPORT CARD

HIGHER SCORE = FASTER RETURN TO WORK

The Return-to-Work Score is the most significant calculation used by the BWC to determine the performance of an MCO. The number (above 50) represents a BWC-calculated score, not actual days absent. **Health Management Solutions would have to add an additional 20% in days missed (an average of 16 days per lost time claim PER YEAR) to drop to the statewide average.***

*Results shown in graph come from BWC data based on fourth quarter Days Absent information as published in the 2018 MCO Report Card.
