Apprenticeship and Career Pathways Showcase

There are so many options.

The road to success never starts in the same place for everyone. Young people have many opportunities to begin exciting and fulfilling careers by pursuing technical or on-the-job training and apprenticeships.

Families and students in grades 6 through 12, as well as recent high school graduates, are invited to join us at these **FREE** showcases to experience a variety of careers through demonstrations and discussions.

Our exhibitors will include representatives from key career pathways, including **healthcare, transportation, advanced manufacturing, construction, culinary, hospitality, information technology, and public safety**, along with regional technical schools offering training and credentials.
