Cyber Security Seminar: Business Networks vs. Bad Guy Hackers

Modern business owners need to be vigilant about protecting their network and their data. Locking the front door is not the only security measure every business must do daily. If one bad guy hacker gets in, you could lose everything. Are you secure? Do you have a plan for if the worst happens? During this discussion seminar, we will learn about the Bad Guys and how to protect yourself, your information and your company finances. All attendees will also be eligible for a network security scan of their business network!

Tuesday, June 16 @ 5:30pm

David Hodgert is the VP of Sales & Marketing and a partner at 10D Tech. 10D Tech manages and supports IT infrastructure, including wired and wireless networks, workstations, cloud services, and phone systems. Cyber Security Workshop: Backup and Disaster Recovery
The worst has happened: You've been hacked, and all of your data is being held for ransom! This can absolutely ruin your business, just like it's ruined so many others. This could happen to anyone, but with a data backup and disaster recovery plan in place, the worst is avoidable. Having a good plan, these disasters become mere inconveniences, causing only minor downtime. Come to our workshop to learn how to set up and implement these plans and policies to protect yourself.
As an added bonus, all attendees will be eligible for a security scan of their business network, a \$475 value!

Wednesday, July 22 @ 5:30
