SHORT-TERM RENTAL (STR) MANAGEMENT - FOUR COURSES (SEPTEMBER)

UVU

800 University pkwy

Orem, UT 84058

08:00 AM - 04:00 PM MST

Lisiate Quinones, 8018637399

excedsupport@uvu.edu

"Renting a room or an entire home to guests for short stays can be profitable, or it can create loss and liability. Understanding and applying industry "best practices" can benefit hosts and guests. This certification course reviews time-honored and innovative STR management practices, including an overview of the industry, regulations and accounting, marketing and reservations, guest and neighbor relations, maintenance and housekeeping, design and decor, security and guest safety, tech devices and apps, opportunities, challenges, and more! Previous course graduates have evaluated it as vital training they would recommend to all hosts, property managers, realtors, vendors, and investors. The classroom discussions and networking add to the comprehensive instruction presented by an industry leader with over 30 years of experience owning and managing successful vacation homes/short-term rentals. And it costs less than a short reservation. The course includes instruction, testing, the Vacation Rental Management 411 textbook, and additional resources. Graduates also earn use of the respected STR Certification Seal which shows that they have taken their STR knowledge to a professional level. Real Estate professionals may earn 10 CORE CE from the Utah Board of Real Estate. When you rent a home or room to guests, it's a business with risks and benefits. This quality STR education can unlock doors to greater profitability, enjoyment, and success!"

September 18, 2019

AUTOMATION AND PROGRAMMING ESSENTIALS

UVU

800 University pkwy

Orem, UT 84058

06:00 PM - 09:00 PM MST

Lisiate Quinones, 8018637399

excedsupport@uvu.edu

Building upon the Introduction to Professional Programming course, this Automation and Programming Essentials course takes a job and task related approach to programming. Students will learn to read and write comprehensive programs from scratch that execute basic tasks and automate (or, replace) common tasks in the workplace. Students will become familiar with different styles of programming (including Functional Programming, Object Oriented Programming, Procedural Programming, and others). Primary language for the course will be Python taught at an intermediate level, but a significant portion of the class will be spent learning SQL and reading and writing to databases. Prerequisite: UVU Introduction to Professional Programming Certificate or significant industry-based programming experience.
