May is Skin Cancer Awareness Month, a great time to focus on protecting your skin and prioritizing your health.

Skin cancer is one of the most common types of cancer, but it is also one of the most preventable and treatable when detected early. That's why we encourage all of our patients to schedule a yearly skin exam. These exams allow us to identify any changes or concerns early, when treatment is most effective.

In addition to annual check-ups, daily sun protection plays a key role in reducing your risk. We recommend:

*Using a broad-spectrum sunscreen with SPF 30 or higher every day
Reapplying sunscreen every two hours when outdoors
Wearing protective clothing, hats, and sunglasses
Seeking shade during peak sun hours (10 a.m. to 4 p.m.)*

Even on cloudy days or during routine activities, UV exposure can add up over time.

If you haven't had your annual skin exam, we invite you to schedule an appointment with our office. Taking a few simple steps now can make a lasting difference in your skin health.

To book your visit, please call us at 505-855-5503.

Jerusalem Demsas, journalist, author, and leading voice on housing policy, will explore how communities like Albuquerque can strengthen planning and zoning approaches to increase housing supply while balancing neighborhood character, equity, and long-term economic health. As Albuquerque continues to grapple with infill development, housing shortages, and growth along key corridors, she will share models of successful reform. She will also highlight the tradeoffs cities face when local process, preservation, and participation intersect with the need to build more housing. This session will offer insights into how Albuquerque can better respond to housing pressures and manage change. Demsas is currently Editor-in-Chief of The Argument and formerly a staff writer at The Atlantic.
