Marketing professionals help business owners understand how to attract customers, build their brand, and grow visibility through effective strategies and messaging.

Accounting experts provide guidance on bookkeeping, taxes, cash flow, and financial organization, helping businesses stay compliant and make informed decisions.

Legal professionals offer insight on business structure, contracts, compliance, and risk management, ensuring businesses are protected as they grow.

Technology specialists support businesses with tools, systems, and digital solutions that improve efficiency, security, and scalability.

Financial professionals assist with funding options, budgeting, credit, and long-term planning to help businesses build stability and prepare for growth.

Together, these professionals create a well-rounded, interactive workshop where attendees can ask questions, receive practical advice, and walk away with a clearer understanding of how each area works together to strengthen their business.

AI : Focus on Time & Money Efficiency

The Urban Chamber of Commerce

1951 Stella Lake St

Las Vegas, NV 89016

11:30 AM - 01:00 PM PST

This workshop helps professionals and business leaders understand how AI can be used to support time and cost efficiency in day-to-day work, rather than as a complex or purely technical solution. Through practical explanations and real-world examples, participants explore where AI can reduce manual effort, simplify processes, and assist with prioritization. The focus is on awareness, practical application, and informed experimentation, helping attendees make more confident decisions about when and how AI may be useful in their roles or organizations.

What Attendees Will Gain:

- *A clearer understanding of where AI may improve time and cost efficiency*
- *Practical examples of everyday AI use in work processes*
- *Simple frameworks for identifying efficiency opportunities*
- *Awareness of common limitations and considerations when using AI*
- *Insights into using AI to support, not replace, decision-making*
- *Exposure to real-world, relatable use cases*
- *Initial next steps for exploring AI tools responsibly and effectively*
